

Interaction in the Public

Aesthetics, Social Acceptability, and Social Context

Case Sheet

We ask all participants to briefly describe a technology they frequently use or which they work on. The technology should have a social use context, which means to us that some other people are present – strangers, colleagues, or family members (or any other people).

Please fill out the boxes below and attach this file to your email, together with the application form. We will use these cases during the workshop in an interactive session.

General Information

Use Context:

Picture

--

You can print and scan this sheet if you want to provide a hand-drawn image or include a printed photo. If you have a digital photo and don't know how to include it in the pdf, just attach it separately in the mail.

Description

--

Please provide some more details here. For example, what is the purpose of the technology? How many people use it? Which activities can the users perform with this technology?
